Lab experiment

Write a Prolog Program for STUDENT-TEACHER-SUB-CODE.

Prolog:

```
% Student-Teacher-Subject Code Database

student(101, 'Arun', cse).
student(102, 'Priya', cse).
student(103, 'Rahul', ece).
student(104, 'Anu', it).

teacher(t1, 'Kumar', cse).
teacher(t2, 'Ravi', ece).
teacher(t3, 'Meena', it).

subject(cse, 'Database Management System').
subject(ece, 'Digital Electronics').
subject(it, 'Artificial Intelligence').

% Find student details
student_details(ID, Name, Dept) :-
    student(ID, Name, Dept).

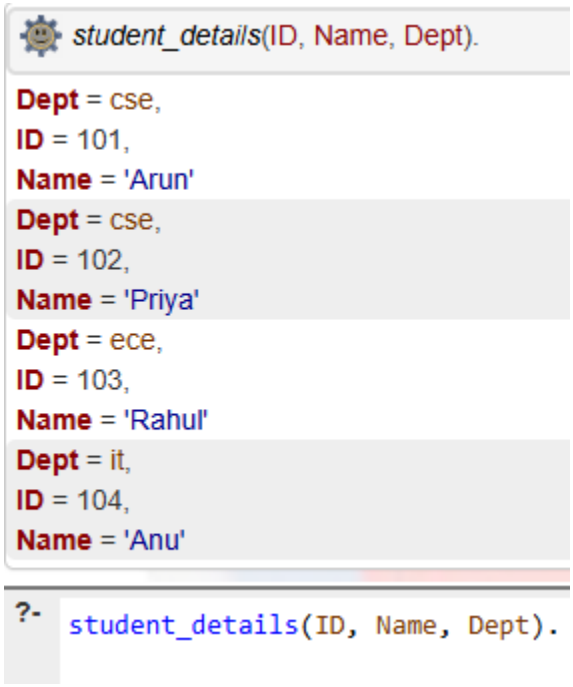
% Find teacher details
teacher_details(Code, Name, Dept) :-
    teacher(Code, Name, Dept).

% Find subject details
subject_details(Dept, Subject) :-
    subject(Dept, Subject).
```

Query:

```
student_details(ID, Name, Dept).
```

Output:



student_details(ID, Name, Dept).
Dept = cse,
ID = 101,
Name = 'Arun'
Dept = cse,
ID = 102,
Name = 'Priya'
Dept = ece,
ID = 103,
Name = 'Rahul'
Dept = it,
ID = 104,
Name = 'Anu'
?- student_details(ID, Name, Dept).
